# Maine Owl Monitoring Program

## SURVEY NOTIFICATION

To Whom It May Concern:

We are participating in the Maine Cooperative Owl Surveys, sponsored by Maine Audubon and the Maine Department of Inland Fisheries and Wildlife. These surveys are conducted at night. We make brief roadside stops and play short tapes of owl calls throughout a 15-minute listening period. We conduct eight survey stops along an established road route, and the entire survey takes about three hours. This letter is to let you know we will be conducting surveys in your area. Our vehicle will be marked with a bright "OWL SURVEY IN PROGRESS" sign in the front and rear windows. For more information about this project or if you have questions, please contact Susan Gallo at Maine Audubon at 781-6180 ext. 216 or Tom Hodgman at the Maine Department of Inland Fisheries and Wildlife at 941-4482.
