MAINE
AUDUBON

How to put your observations on iNaturalist with a mobile device.

Step 1. You must have iNaturalist on your device – Apple or Android based. To do this, download the iNaturalist app.

Step 2. Join your project. If you want to practice search on **Practice - Maine Audubon** and use this one.

Step 3. Insert your observations:

Follow the prompts to upload the data on your observation. You can take a picture of your specimen on iNaturalist by clicking on the camera icon on the top right. The location is automatically captured by your device.

Step 4. Sync your observations to the correct project. This step requires WiFi.
